

It's Not Easy Being Green

We've been farm-raising shrimp for almost 30 years – so we know.

It takes complete commitment and total control.

At Seajoy, we have both. A founding member of the Global Aquaculture Alliance, we are committed to farming all natural shrimp using sustainable techniques.

All our farms have been "*Best Aquaculture Practices*" certified – by the *Aquaculture Certification Council*. And because we operate our own farms, hatcheries and processing plants, we have total control of the shrimp-farming process, allowing us to offer *Organic Shrimp* – certified by *Quality Certification Services*. Plus, as a geographically diverse producer – with farms in Ecuador, Nicaragua and Honduras – you can count on Seajoy to ensure your clients have a reliable supply of premium quality, all natural, value-added shrimp.

Seajoy Shrimp – Good for the Environment... Good for You!
